TODAY**

Patent pending and made in the UK.

Volvinascreen is to be used between beds that cannot be socially distanced. Its wipeable PVC fabric helps to prevent the spread of infection in a hospital ward, ensuring all patients feel safe.

Volvinascreen is unique as it offers both privacy and visibility. The PVC panels are quick and easy to roll up using the plastic poppers. This provides visibility for both staff and patients via the clear panel.

- ✓ **Easy to clean and can be cleaned in situ.**
- ✓ **Can be hung on any cubicle track system by attaching the gliders/ hooks through the metal eyelets.**
- ✓ **Cost savings – no disposal, facilities or laundry costs.**
